Nationality: India

💼 Work Experience

January 2024 - Till Date

Web Designer

Freelace

Malappuram, Kerala

A web designer is a professional who creates the visual elements and layout of a website. They are responsible for designing the overall look and feel of the site, including graphics, colors, fonts, and navigation. Web designers typically use software such as Adobe Photoshop or Sketch to create mockups and prototypes of websites before they are developed by web developers. They work closely with clients to understand their needs and goals in order to create a visually appealing and user-friendly website.
